

Homework #N — Deep and Reinforcement Learning

Module X, Lecture Y: Lecture Title

Srikanth Pai, Asst. Professor, MSE

Due: before the next class

Instructions

Answers should be concise and mathematically precise. State any theorem you use before applying it.

Problem Set

1. Prove or disprove: [statement from today's lecture]. Give a concrete example illustrating your conclusion. [Hint: ...]

from today's lecture.

t lecture's key idea.

2. **(DS students)** Implement [algorithm from today's lecture] from scratch in Python using only NumPy. Apply it to [small dataset or synthetic data]. Report [specific quantity] and explain what you observe.
