

Lecture Y: Full Lecture Title

Module X — Module Title

Srikanth Pai
Madras School of Economics

Replace this paragraph with the motivating narrative. Introduce the central idea in plain language. Key concepts appear *italicised as working definitions* — loose but ML-clear — when first used. These working definitions live here in prose, not in a `\begin{definition}` block.

1 Section Title

Prose explaining the concept. A *working definition* of *concept name*: one or two sentences, ML-clear. Build intuition before any formalism.

Definition 1.1. Precise statement used in the theorem that follows.

Theorem 1.2. *Statement of the theorem.*

Proof. Proof. Each step follows from ...

□

Remark. Note the elegance of this argument: ...

Exercise 1. Exercise statement. [Hint: ...]

Algorithm 1: Algorithm Name

Input: Input: description

Output: Output: description

```

1 Initialise ...;
2 for each iteration do
3   | Step 1;
4   | Step 2;
5 end
6 return result;
```

Business Context

Describe a real business or economic application of this lecture's key idea. One short paragraph. MBA students engage with this; DS students read past it.
